

Jio Dedicated Internet Leased Line Call: 9113098553

**Unblock traffic
congestion.**

- **Jio Dedicated Internet Leased Line (ILL)** is a premium internet service that provides a dedicated, symmetrical, and consistent connection to the internet. Unlike shared broadband connections, a leased line offers guaranteed bandwidth and is not affected by peak-time congestion or usage by

Typical deployment steps

1. **Feasibility survey** – Jio engineers check Fiber availability to your premises.
2. **Bandwidth & SLA selection** – Common tiers: 10 Mbps → 10 Gbps; choose primary/secondary paths if desired.
3. **Contract & paperwork** – Service order form, MSA, IP-address requisition.
4. **Fiber pull & CPE install** – Jio places an optical-network-terminal (ONT) or managed router; you'll get hand-off on Ethernet or Fiber.

When it's worth the premium

- Mission-critical SaaS, ERP, or data-centre connectivity
- Multi-site MPLS/SD-WAN needing guaranteed back-haul
- Low-latency trading, telemedicine, live-stream production
- Heavy upstream traffic (off-site backups, CDN push, CCTV)

How to get the best deal? [Call: 9113098553](tel:9113098553)

1. [Ask for dual quotes](#) – 12- vs 24-month terms; the longer term can shave 8-12 % off the MRC.
2. [Bundle static IPv4 /29](#) – It should be included free; don't let it appear as an add-on.
3. [Negotiate SLA credits](#) – Aim for $1.5 \times$ pro-rated MRC for every hour beyond the 4-hour MTTR.
4. [Check PoP diversity](#) – For high uptime (>99.95 %), take a ring topology (two fibers landing at different Jio PoPs). Incremental cost $\approx$ 35-40 % of single link but doubles resilience.
